Kayakapi Premium Caves Cappadocia Boutique Hotel aims to continuously improve energy efficiency. In this context, our sustainability committee is directly responsible for energy management. Committee has been organized. Our energy consumption is monitored and reviewed on a daily, monthly and annual basis. Every month "Kayakapi Premium Caves Cappadocia Boutique Hotel energy reports" are updated and important energy usage points are identified. Measures are taken to reduce energy consumption and related investments are made.

In addition to these studies, new investments are evaluated in terms of energy efficiency and it is aimed to reduce specific energy intensity in new services to be produced.

In addition to our efforts to increase energy efficiency, we continue our feasibility studies on the use of renewable energy in order to reduce our carbon footprint in line with sustainable development goals and in the process of harmonization with the European Green Deal.
