## PURPOSE

As Kayakapi Premium Caves Cappadocia Boutique Hotel and its employees, we aim to be a leader in environmental issues on a national and international scale and to continuously improve and maximize our environmental performance in line with the United Nations sustainable development goals and circular economy principles, based on sustainable development strategies in the Boutique Hotel sector.

## SCOPE

This is politics,

Kayakapi Premium Caves Cappadocia Boutique Hotel,

All employees of Kayakapi Premium Caves Cappadocia Boutique Hotel

Includes personnel involved in contracts with suppliers, contractors, subcontractors and other organizations.

The Board of Directors is committed to fulfilling the requirements set out in this policy and expects its employees to fulfill the same commitments.

### To achieve our goals;

To comply with other relevant national and international requirements beyond the legal environmental legislation in force, to continuously review and improve our environmental management, and to report our environmental impacts annually in our sustainability reports,

- Identifying all environmental aspects with a life cycle approach and evaluating their impacts, eliminating and improving environmental risks, reducing them to acceptable levels, preventing pollution to achieve the determined goals and objectives, protecting the environment and natural resources
- Within the scope of combating climate change, to carry out the necessary work on the efficient use of natural resources, to reduce the amount and intensity of carbon dioxide emissions, to determine and follow up the goals and objectives for this purpose, to review the changes and to increase the use of renewable energy resources and energy efficiency studies in this direction
- To reduce our consumption by adopting sustainable, efficient and economical use of resources such as water, energy, raw materials, chemicals, etc. during our activities, and to adopt clean production technologies and the best available techniques that will prevent and reduce waste generation from our activities within the framework of the circular economy, minimize all kinds of emissions, greenhouse gas emissions and their effects on the environment,
